

April 2020

Dear Parents and Carers

The Oak Academy has released a comprehensive bank of complete lessons from outstanding teachers across the country, including from the ATLP.

This collection of high-quality lessons and online resources that has been supported by the Government, in response to the current national situation. The online lessons that have been created by a variety of subject specialists from a range of schools will offer additional support to students studying at home as they support our teaching of the national curriculum.

Our students will be completing Pack 2 of our home learning which has been uploaded the student drive, accessible from the website or requested as a paper copy. These additional lessons and materials from the Academy will compliment and extend students' independent learning whilst at home. The format of the teaching is highly structured, with explanations and modelling alongside self-assessment and regular quizzing which is in line with our own 'EEE' teaching and learning model. We highly recommend using these lessons for our students and feel they are beneficial.

On our school website there is a variety of online resources that students can access online, a list of these websites can be found on the school website under "A guide to supporting your child at home". Included on this guide is a list of email addresses for each subject area, if you have any queries about the work in our home learning packs so that we can provide you with support.

Also on the pupil area there are additional activities students can complete again to develop their understanding of topics covered and use their thinking skills to recall and revisit topics they have studied so far.

Please do not hesitate to contact us if you have any questions regarding the home learning and the additional resources.

Yours faithfully

**Mrs L Norton**  
**Assistant Headteacher**
